

COBALT B12

MAXI GRO

Many regions in the UK are deficient in Selenium, and Cobalt which is required by ruminants to synthesise Vitamin B12. Maxigro helps to compensate for deficiencies in forage which can cause many problems eventually leading to weight loss.

MAXI GRO + B12

ADMINISTRATION:

Administer as a drench having first checked the applicator for safety and accuracy. Repeat as required, but at no less than 4-6 week intervals. Shake well before use. Do not exceed the recommended feeding rate.
